SPECIALISED GUIDANCE FOR BANKS IN ASSESSING RENEWABLE ENERGY PROJECTS UNDER CONSIDERATION FOR FINANCING

Renewable energy project finance is a growing sector worldwide. In order to help you assess the credit quality of these loans, GCPF offers technical assistance to its partner banks by providing specialised advice and training in assessing a renewable energy project. This includes on-the-job training during an on-site assessment to evaluate all technical, environmental, institutional, socio-economic and financial aspects of the project. Furthermore, a consultant will conduct a two-day training programme for your project finance department and provide checklists, manuals and guidelines. All training is designed to be pragmatic and deepen your project finance department's knowledge of a particular renewable energy technology (e.g. solar, wind or energy efficient buildings). This knowledge base is the key to tapping a fast-paced green energy market and developing a successful portfolio of projects.

AS A RESULT, THE FINANCIAL INSTITUTIONS' PROJECT FINANCE TEAMS WILL:

- be equipped to guide technical assessments for future assignments in line with international best practices and experience;
- gain in-depth knowledge on how to evaluate a project's energy yield projections;
- understand the critical aspects of a technical assessment related to the particular technology;
- acquire guidance tools to manage and engage independent technical experts for future assignments.

BENEFITS FOR YOUR BANK

- Receive project-specific advice and training from a consultant of international standing and with local experience;
- Become well-informed to make investment decisions on a technology that your bank has not previously financed;
- Acquire in-house expertise on how to evaluate renewable energy projects;
- Tap new renewable energy potential in your market.

CONDITIONS FOR SUPPORT

Your bank:

- has entered into a partnership with GCPF;
- has a project energy finance team that can benefit from such technical training;
- deals with renewable energy projects that are eligible for financing by GCPF;
- is eager to finance a particular technology, but lacks sufficient experience to assess such a project;
- will accept, and is willing to provide, relevant information and feedback within the context of the assessment;
- will cover all costs related to local transportation for the consultant/trainer and provide support in obtaining a visa, etc.

TECHNICAL PROJECT ASSESSMENT AND TRAINING PROCESS

About the GCPF Technical Assistance Facility:

The Global Climate Partnership Fund (GCPF) uses public funding to leverage private capital in order to mitigate climate change and drive sustainable growth by providing financing for energy efficiency (EE) and renewable energy (RE) markets in developing and emerging markets. It is managed by responsAbility Investments AG, a leading asset manager in the area of development investments.

The GCPF's Technical Assistance Facility (TA Facility) is a separately established, donor-financed association managed by responsAbility Investments AG. The TA Facility operates independently from the fund. It is sponsored by the German Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety and the United Kingdom's Secretary of State for Business, Energy & Industrial Strategy.

The GCPF TA Facility was established to assist the Fund's partner institutions in overcoming challenges and scaling the impact of their green lending operations. The TA Facility aims to strengthen the capacity and know-how of partner institutions to help them realise the EE/RE market potential and position themselves as leading banks for green lending in their markets. To this end, it offers them access to qualified and specialist consultancy services from international and local experts.
